

Solving mixed addition and subtraction problems in a 10 second interval

$$4 - 3 = \square \quad 9 + 1 = \square \quad 7 + 2 = \square \quad 7 - 3 = \square \quad (5)$$

$$9 - 6 = \square \quad 6 - 4 = \square \quad 1 + 8 = \square \quad 6 + 3 = \square \quad (9)$$

$$6 + 2 = \square \quad 12 + 5 = \square \quad 14 - 2 = \square \quad 5 - 4 = \square \quad (15)$$

$$2 + 1 = \square \quad 13 + 2 = \square \quad 9 - 1 = \square \quad 6 - 3 = \square \quad (20)$$
