

Writing Numerals to Represent Members of a Set and Writing Members of a Set to Represent Numerals

$$\frac{5}{\text{|||||}} + \frac{2}{\text{||}} = \boxed{7}$$

$$\frac{3}{\text{|||}} - \frac{1}{\text{|}} = \boxed{2}$$

$$\frac{4}{\text{||||}} + \frac{3}{\text{|||}} = \boxed{7} \quad 9$$

$$\frac{7}{\text{|||||}} - \frac{4}{\text{|||}} = \boxed{3}$$

$$\frac{2}{\text{||}} + \frac{2}{\text{||}} = \boxed{4}$$

$$\frac{5}{\text{|||||}} - \frac{1}{\text{|}} = \boxed{4} \quad 18$$

$$\frac{2}{\text{||}} + \frac{1}{\text{|}} = \boxed{3}$$

$$\frac{7}{\text{|||||||}} - \frac{3}{\text{|||}} = \boxed{4}$$

$$\frac{5}{\text{|||||}} + \frac{4}{\text{||||}} = \boxed{9} \quad 27$$

$$\frac{4}{\text{||||}} - \frac{3}{\text{|||}} = \boxed{1}$$

$$\frac{1}{\text{|}} + \frac{1}{\text{|}} = \boxed{2}$$

$$\frac{5}{\text{|||||}} + \frac{4}{\text{||||}} = \boxed{9} \quad 36$$

$$\frac{5}{\text{|||||}} + \frac{5}{\text{|||||}} = \boxed{10}$$

$$\frac{4}{\text{||||}} - \frac{3}{\text{|||}} = \boxed{1}$$

$$\frac{7}{\text{|||||}} - \frac{2}{\text{||}} = \boxed{5} \quad 45$$
