

Writing Numerals to Represent Members of a Set and Writing Members of a Set to Represent Numerals

$$\frac{5}{\text{|||||}} + \frac{2}{\text{||}} = \square$$

$$\frac{3}{\text{|||}} - \frac{1}{\text{|}} = \square$$

$$\frac{4}{\text{||||}} + \frac{3}{\text{|||}} = \square \quad 9$$

$$\frac{7}{\text{|||||}} - \frac{4}{\text{|||}} = \square$$

$$\frac{2}{\text{||}} + \frac{2}{\text{||}} = \square$$

$$\frac{5}{\text{|||||}} - \frac{1}{\text{|}} = \square \quad 18$$

$$\frac{2}{\text{||}} + \frac{1}{\text{|}} = \square$$

$$\frac{7}{\text{|||||||}} - \frac{3}{\text{|||}} = \square$$

$$\frac{5}{\text{|||||}} + \frac{4}{\text{||||}} = \square \quad 27$$

$$\frac{4}{\text{||||}} - \frac{3}{\text{|||}} = \square$$

$$\frac{1}{\text{|}} + \frac{1}{\text{|}} = \square$$

$$\frac{5}{\text{|||||}} + \frac{4}{\text{||||}} = \square \quad 36$$

$$\frac{5}{\text{|||||}} + \frac{5}{\text{|||||}} = \square$$

$$\frac{4}{\text{||||}} - \frac{3}{\text{|||}} = \square$$

$$\frac{7}{\text{|||||}} - \frac{2}{\text{||}} = \square \quad 45$$

Writing Numerals to Represent Members of a Set and Writing Members of a Set to Represent Numerals

First Grade
